DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the internal surface coverage by fibers being 2-20 percent must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Election/Restrictions

This application is in condition for allowance except for the presence of claims 4 and 6 directed to an invention non-elected with traverse in the reply filed on November 2, 2009. Applicant is given TWO MONTHS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.

This application is in condition for allowance except for the following formal matters:

The existence of non-elected claims as set forth above, and the requirement for a drawing.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Response to Arguments

Applicant's arguments filed March 11, 2010 have been fully considered but they are not persuasive. With regards to the arguments directed at the claim language, such was considered persuasive and the rejections have been dropped, however, as set forth above claims still remain in the application which are withdrawn with traverse. With regards to the figures not showing claimed subject matter, such is still required in that there is not a clear understanding from the figures how the internal surface is only covered by 2-20% when the figures appear to show a completely covered circumference with no gaps or missing area that contains an absence of fibers, therefore there is no showing that only 2-20% is covered, and therefore it is not clear from the drawings in what way it is only covered 2-20%. For instance are there spaces along the longitudinal length that have no fibers and amount to the 2-20% or are the figures inaccurate to show a complete coverage around the interior circumference. Therefore, with there being no clear understanding of how such is achieved, there can be no clear understanding without a corrected drawing or a drawing showing this claimed feature, especially when the figure showing such structure is densely packed with fibers around the entire interior surface. The objection to the drawings is still being held and a response should include a proposed drawing as stated above.
